 - Project Schedule Variance < 3.5%
 - Defect Removal Efficiency > 98%
- **Institutionalized Risk Management:**
 - Well defined processes and methodologies to identify, manage/track and mitigate risks like offshore employee turnover, IP loss, data security, service quality and cultural differences

Case study: Enterprise IT services for a billion-dollar Civil Engineering Company

“ennovate has done an excellent job in understanding a business finance issue, designing a solution and planning for the future, resulting in many game changing successes for us in Business Intelligence. I recommend ennovate and look forward to many successful projects with them”

BI Director

“We have been extremely happy with our relationship with ennovate. They staffed us with highest quality consultants, both onsite and offshore. I would recommend them to any company for their flexibility, commitment to service and attention to detail”

VP - IT

Customer Profile:

Our customer is a 100 year old, billion-dollar Construction Company (US based) offering a wide array of innovative solutions for both development and rehabilitation of existing structures and sites.

Customer Challenges:

The customer acquired many companies over the years that resulted in numerous IT challenges - diverse applications on different platforms, functionality consolidation into cohesive applications and lack of documentation.

The customer wanted ennovate to streamline the existing applications, implement CRM, provide Business Intelligence and leverage all the existing IT investments.

Our Solutions & Benefits:

Through our proven delivery experience with Onsite-Offshore engagement model, we won our customer’s confidence and within a year of our services we became their partner for all IT services and also entered into a multi-year services contract.

Application Development & Enhancement:

We identified solutions to eliminate unused applications, combined applications with similar functionalities, enhanced the utility of existing applications and created new applications where required.

Application Maintenance:

Within a short span of time, we optimized 35% of their database space & reduced the number of applications by 30% with enhanced functionality resulting in lower cost of maintenance.

ERP Implementations:

We were involved in end to end implementations of ERP packages on CRM and financial accounting and provided complex customizations which were applauded by the customer as well by the vendor themselves.

Business Intelligence:

We created an enterprise data warehouse – a one stop solution to facilitate BI. Our BI solution helped our customer to reduce their BI IT budget by 40% and provided solutions to all operational and strategic users.

Technologies:

Microsoft Technologies:

- BizTalk Server, SharePoint Server, .NET Frameworks
- SQL Server 2005 – SQL Server Integration Services (SSIS), SQL Server Reporting Services (SSRS), SQL Server Analysis Services (SSAS)
- Dynamics – CRM, Great Plains (GP)
